
Silicon Valley Solar Pioneer and Wild Brush Energy Announce the Signing of a LOI

Seattle, WA, Mar 29, 2010- Wild Brush Energy (WBRE.PK) has signed a Letter of Intent with Californian solar panel manufacturer Auxin Solar. The letter outlines an agreement between Auxin Solar and Wild Brush Energy to supply solar paneling for the Company's US Solar Park Developments.

Auxin Solar is located in the heart of Silicon Valley in Northern California. The Company Founders have over 30 years of silicon design experience. They bring a wealth of experience to photovoltaic module design, manufacturing, and production quality.

The project target size is approximately 4MW. This would provide an annual power output upwards of 5.5 GWh. A solar park of this scale will supply approximately 1200 households with renewable energy, and reduce carbon emissions by about 3100 tons annually.

Part of Wild Brush Energy's diversified renewable energy strategy includes the construction of mid to large-scale solar parks. These parks will range in size from 2-5 Mw in scale. The location of these parks will be in southern and southwest regions of the U.S. and southern European countries with favorable renewable energy policies and economic returns.

About Wild Brush Energy Inc.

Wild Brush Energy Inc. is a diversified energy company whose goal is to identify and develop clean air energy producing alternatives. Wild Brush is presently exploring green energy producing opportunities such as large scale Commercial Wind Farms, Solar Energy Parks, and Small Scale Hydro Electric projects; both within North America and abroad.

Safe Harbor for forward-looking statements

This release contains certain statements that are "forward-looking" statements (as the term is defined in the Private Securities Litigation Reform Act of 1995). Any such forward-looking statements are inherently speculative and are based on currently available information, operating plans and projections about future expectations and trends. As such, they are subject to numerous risks and uncertainties, such as general economic and business conditions, the ability to acquire and develop specific projects, the ability to fund operations, and other factors over which Wild Brush Energy Inc. has little or no control. Actual results and performance may be significantly different from expectations or trends expressed or implied by such forward-looking statements. Wild Brush Energy Inc. expressly disclaims any obligation to update the statements contained in this release.
